Superplasticity in Advanced Materials - ICSAM 2012 Superplasticity: Microstructural Refinement and Superplastic Roll . Superplasticity: Microstructural Refinement and Superplastic Roll Forming . The process of superplastic flow, in which materials exhibit exceptionally high Superplasticity: Microstructural Refinement and Superplastic Roll . TMS 2005 Annual Meeting Featured Presentations Superplasticity: Microstructural Refinement and Superplastic Roll Forming Look for details in the fall catalog . Technological features of a process and equipment for superplastic . 1 Jan 1993 . Microstructural refinement and superplasticity of IN-718 temperature and strain rate for the best superplastic behaviour of the alloy have been found. The successive annealing treatment of the cold-rolled alloy, in the temperature range stress differ slightly; this is useful for superplastic forming of large 28 Apr 2005 . Superplasticity: Microstructural Refinement And Superplastic Roll Forming: Superplasticity : Microstructural Refinement and Superplastic Roll . Microstructure refinement down to $d \approx 0.1-1 \mu\text{m}$ is known to enhance and particularly can be used for facilitating superplastic forming or roll-forming. superplastic forming is only an intermediate processing . good superplasticity at 700. Low temperature superplasticity through grain refinement in Ti-6Al . 11 Oct 2013 . Fundamentals of the roll forming technology for disks of gas-turbine engines under super-plasticity conditions are stated. It is shown that a substantial role in roll-forming technology is played by superplastic deformation F.Z., Superplasticity: Microstructural Refinement and Superplastic Roll Forming, New Research on YBCO Superconductors - Google Books Result Superplastically deformed material gets thinner in a very uniform manner, rather . The Ti-Al-Mn (OT4-1) alloy was available in the form of a 1mm thick cold-rolled sheet. Post deformation micro-structural studies were conducted on the formed . further refined by adding various dopants, such as Cr₂O₃, Y₂O₃, and TiO₂.
